Dear Mr. Wersberg

I have finished reading Howard Roffman's Presumed Guilty and am very impressed with the book and the scholarly use he made of your material. Indeed, he is very fortunate to have such a fountain-head of knowledge available to him. The evidence he presents in very damning - quite properly so.

It must be most gratifying to you to see your past and present work prominently mentioned in the current press. Your "Assassination transcript" ~~has~~ was figured prominently in articles which appeared in U.S. News & World Report, Phoenix, and Rolling Stone. However I'm slightly confused, reference is made to the transcript of the Jan. 22, 1964, and the fact you've obtained it also. Is that available in any form yet, or is it the basis of your next book?

Roffman's references to the Post Mortem volumes have piqued my curiosity. In your letter to me you mentioned that they weren't commercially available, yet. Has that situation changed? Would it be possible to obtain a pre-publication copy or a Xerox copy? The references are very provocative. Please keep me informed of your latest works.

Best wishes and good hunting!

Raymond E Ritchie
